customerservice@millerhatcheries.com
9420 - 109 Street Westlock, AB T7P 2R4

Dear fellow poultry enthusiast,

Thank you for your support this past year!

Last year's 6 new breeds were introduced to provide you more selection of chicks and poults. You provided great reviews so the number of breeders will be increased to provide you more availability for 2025! Guinea Fowl will be available this year! They are fantastic backyard birds providing excellent pest control and are a fantastic watchdog, sounding the alarm when predators are nearby. We are hatching them on select dates, so make sure to get your orders in early!

Miller Hatcheries is proud to be a federally registered hatchery. Hatcheries are the first critical point of potential disease spread in a poultry production system. We undergo strict daily testing for diseases, biosecurity, hatching practices, animal welfare and tracing to be a registered hatchery. When you buy chicks from us you are guaranteed a healthy superior quality chick hatched in optimal conditions!

We are proud to support our local Canadian farmers. These farmers take great pride in the quality of their birds and the conditions in which they are raised. We thank our farmers for their hard work and care they give to produce top quality hatching eggs for the hatchery!

Wishing you all the best this year, and Miller Hatcheries looks forward to serving you with top quality Canadian chicks!

Jeff Kamlah

OUR GUARANTEE

- 1.) Shipping date requested is only approximate. Actual shipping date will be listed on your order confirmation, unless otherwise notified. Please arrange to pick up your chicks immediately upon arrival.
- 2.) We guarantee 100% live arrival at the destination site (excluding extras) provided shipment is checked when received. If there are any dead notify us or our agent immediately.
- 3.) We guarantee 85% accuracy on all our sexed orders. Any sexing errors in chicks should be reported as soon as sex can be accurately determined. (approx. 8 weeks old). Unsexed orders are shipped as they come from the incubator. The ratio in smaller orders of chicks often tends to be uneven and we cannot be responsible for rooster to hen ratio on unsexed orders.
- 4.) We guarantee that all champion chicks are produced from eggs supplied by strong, healthy, government registered breeding flocks. Poultry can still carry germs and pass them to their chicks.
- 5.) We cannot assume responsibility for any disease outbreaks after the chicks leave our premises.
- 6.) While we exercise every precaution in filling orders, we cannot for any reason be responsible to any greater extent than the invoice value of the chicks in question. We will not be liable for any consequential or incidental damages.
- 7.) Orders shared between customers do not qualify for our guarantee. Any guarantee we offer becomes null and void.
- 8.) All orders are accepted subject to strikes, floods, disease outbreaks, acts of God, or delays beyond our control.
- 9.) We will credit any *loss occurring within 2 weeks of shipment of day old chicks without question, providing the loss livability report is returned to us within 3 weeks of shipment. *Loss over 10% of any one breed must be accompanied by a veterinary report indicating that the loss was a result of poor quality chicks provided. Does not include extras. Dual purpose and heritage "packages" are considered one breed when calculating the 10%.
- 10.) All sales are F.O.B. Westlock

PREPARING YOUR BROODER ROOM

***BEFORE YOUR CHICKS ARRIVE:** ** At least a week before your chicks arrive*, not the night before, prepare your coop: Thoroughly clean and disinfect your brooder area from top to bottom, including all feeders, waterers and brooder lamps, all the equipment, walls, ceiling and floor. We recommend VIRKON for disinfecting. Allow the area to dry completely to avoid mold.

***PRE-WARM THE AREA FOR AT LEAST 24-48 HOURS BEFORE THE CHICKS ARRIVE!** Check temperature at chick height. Check for cold spots and drafts and eliminate drafts by repairing windows and doors. Plastic is no substitute for insulation! Do not seal off all air flow either. Good ventilation is essential for a dry brooder house and healthy chicks! Ensure area surrounding your brooder is also warm - around 75°F/24°C. Check that all your equipment is ready and working. Night-time lows can be deceiving, using a high-low thermometer will eliminate a lot of heartache by enabling you to check the night-time temperatures.

***DO NOT USE NEWSPAPER!** Use an absorbent bedding like wood shavings 2-4 inches thick. Make the surface as level as possible especially for turkeys who may fall into a dip and not be able to right themselves.

***THE WATER NEEDS TO BE COLD SO THE CHICKS DO NOT CLIMB INTO IT.** Put out the feed but hold off on putting the water out until just before the chicks arrive. Feed and water must be within the comfort zone of the chicks and available for the chicks at all times. Clean waterers daily and place them on slatted or wire platforms so birds will be kept away from the wet floor. A good crumble, not pellets or mash, will encourage uniform distribution of nutrients and give the chicks a good start. Provide fresh water daily, and if you are adding anything to their water be sure to mix it fresh daily.

*Feed 20% protein chick starter for 3 weeks for broilers, 8 weeks for layers. Turkeys and Bantams, should get a 25% - 28% turkey starter for 8 weeks. Then change to a 16% - 20% poultry grower. This can be mash or crumbles. During the growing period, unvaccinated chicks should have a coccidiostat in the feed. If mixing your own feed, be sure to use a poultry supplement concentrate. Do not dilute a complete feed.

BROODER SET UP

Set up your equipment as shown in the picture. Use 18" cardboard brooder guard to make a circle that provides approximately 0.5 sqft/chick. Use 20 ft of brooder guard for 50 birds; 25 ft for 100 birds; 30 ft for 150 birds; and 35 ft for 200 birds. Use one, 250W red heat bulb for every 50 birds; ensuring that you have a safe and reliable power source. A 4-bulb brooder with a thermostat is best, since it can be adjusted to regulate the temperature. Turn more bulbs on as required to maintain the temperature and provide a back up heater as necessary.

Start your heat lamps 18" from the floor. Use two, 2" feeders and one, 1 gal fount for every 50 birds. The chicks should not require the brooder guard after 7 - 10 days. The area allowed for the chicks should be increased after 2 weeks by 50% and further after four weeks.

Pay special attention to the TEMPERATURE!
Ambient or room temperature should be maintained at 24°C (75°F) for 24 hour temperature control and avoiding those nasty night-time lows!

Here is a very simple, yet complete set up in which to start out your baby chicks

BROILERS/CORNISH ROCK GIANTS

Over the last 36 years the broiler has become an exceptionally fast growing bird. As nice as it is to get meat in the freezer quickly, the speed of growth has brought its own set of problems. These fast-growing birds tend to be susceptible to leg problems, heart attacks and ascites (fluid filled abdomen).

Following our suggestions below will minimize these problems.

> Keep chicks warm and in a small area to start; early chilling, overheating, or huddling will cause continued problems later. Start your chicks at 32°C (90°F) measured furthest from the heat source in the brooding area at chick height. Ventilation is important from the first day. Add heat lamps if necessary but do not seal up your brooder so that air supply is completely cut off. Increase ventilation as chicks get older. The air should feel dry, not musty.

> Feed 20% chick starter for 3 weeks; then switch to a 16% grower during the fourth week. Allow 1 kg of starter per bird before switching to grower. Well balanced chop may be used from the 6th week. Grains need to be fed with the addition of a poultry supplement!

> For the first 4 - 5 days, provide 23 hours of light. Start reducing the hours off light by ½ hour per day until the birds receive 8 - 10 hours of dim light (you should just be able to read a newspaper). A time clock that will allow 8-10 hours of growing time is ideal. If a black out situation is not possible, then be sure that the birds clean out their feeders before refilling. Going too long without food may result in them eating the bedding material.

> Once the birds are a week old, you should start to move the feeders and waterers further apart from one another. Do this a bit at a time until they are at least 4 - 5 feet apart. As your birds grow be sure that they have plenty of room to move around.

For additional information and frequently asked questions please visit our website at WWW.MILLERHATCHERIES.COM

MILLER HATCHERIES PHOTO CONTEST 2025!

We invite you to send us your photos of your birds purchased from Miller Hatcheries!

Email your best photos to

CUSTOMERSERVICE@MILLERHATCHERIES.COM

CONTEST RULES:

Entries must include:

The photographers First name

Location (Town name)

The breed of the bird(s) in the photo(s)

If there is a person in the picture, they must be unrecognizable

Photo(s) must be original content created by the person entering the contest

Photo(s) must be of your birds purchased from Miller Hatcheries

Photo(s) must not have been published before and of a good quality data (RAW preferred)

Top 3 photos will be chosen by staff and will receive a prize.

Final results and selection of winners will be at the discretion of MILLER HATCHERIES.

First Place Prize: Cover photo on the 2026 Catalogue and 50% off first order up to \$200.00 plus free shipping!

Second Place Prize: Inside feature in the 2026 catalogue and 50% off first order up to \$100.00

Third Place Prize: Inside feature in the 2026 catalogue and 25% off first order up to \$100.00

Miller Hatcheries Reserves the right to eliminate any photos that do not meet the guidelines, are inappropriate for the category or that are of insufficient quality or size to be published in our catalogue.

REGULATIONS:

By entering the contest, you are granting MILLER HATCHERIES a non-exclusive right to use submitted images in any form for any purpose, including printed materials (such as the annual catalogue), digital marketing, social media and any other use, in perpetuity, without any form of remuneration or permission.

Contest closes November 15, 2025

MILLER'S CORNISH GIANTS

The **Millers Cornish Giant** is the bird that can give you almost 1 lb of gain for 2 lbs of feed! While the hens gain rapid breast meat, the roosters gain bone structure first and then fill out. Both provide good, even, high quality meat. These birds have been bred for the table. They are not recommended as a layer. Grow up to 2000 per year in Alberta without quota and you have the potential of a good return on your investment.

Recommended Feeding:

Day 1 to week 3: 20% Protein Chick Starter

(Medicated unless you have had your birds vaccinated against Coccidiosis.)

Week 3 onwards: 16% Chick Grower

(Mix starter and grower gradually over a week.)

You may put them on finisher or a homemade chop for the last 2 weeks before processing. Be sure they do not receive any medication for the 2 weeks prior to processing.

Note: Meat birds cannot attain proper weights on a diet solely consisting of farm grains and scraps. Always add protein supplement to farm grains or feed a recommended complete feed.

CORNISH GAME HENS - Everybody's favorite treat!

A tasty Cornish Game Hen is grown in just 4 to 5 weeks. We send you only the sexed hens, which develop a good breast finish. A Cornish Hen is butchered at 2½ lbs live weight. Note: a Cornish Game Hen is a female Cornish Giant.

Quantities	1-24	25-49	50-99	100+
Unsexed each	\$4.65	\$3.65	\$3.50	\$3.40
Pullets each	\$5.25	\$4.25	\$4.10	\$4.00
Cockerels each	\$4.95	\$3.95	\$3.80	\$3.70

MILLER'S WESTERN RUSTICS

GREAT ALTERNATIVE TO THE CORNISH ROCK GIANT. NEW CROSS! SAME GREAT PERFORMANCE!

The Miller's Western Rustic is a slower growing breed compared to an industrial Cornish Giant and is ideal for the backyard flock.

These birds have yellow skin, strong yellow legs, tasty meat and nice barred red plumage.

More resistant to disease than the Cornish Giants and far more hardy.

Average live weight at 9 weeks is 5.5 lbs and at 12 weeks is 7 - 8 lbs.

SOLD UNSEXED ONLY

Quantities	1-24	25-49	50-99	100+
Unsexed each	\$6.45	\$5.45	\$5.30	\$5.20

Proudly Canadian Sourced

Additional charges may apply if a confirmed order is changed or cancelled

WHITE LEGHORNS

Hybrids require 18% layer ration to maintain vigor and to avoid picking, egg eating and cannibalism!

To bring out the best in your hybrid layers use a lighting schedule as outlined below:

- 1.) Start your chicks with 23 hours of light.
- 2.) At 3 days of age, start reducing the number of hours of light by one hour every 2 - 3 days until down to 10 hours.
- 3.) At 14 days, reduce the light intensity. Dim to just being able to read a newspaper.
Grow to 19 weeks on 10 hours of dim light.
- 4.) At 19 weeks, start to increase the lighting by 1 hour per week for 2 weeks, then ½ hour per week until you have reached 15 hours of light.

NOTE: If you are raising spring chicks on natural light in the summer, when it comes to fall, increase their light by ½ hour per week until 15 hours is reached.

Winter light reduction, quality of food and lack of water or cold temperatures may prevent your your hens from coming into lay, or result in your older hens going into molt (shedding their feathers and cease laying).
If this occurs, go back to the lighting program recommended and start again.

MILLER'S WHITE LEGHORNS

North America's most popular white egg layer-hybrid, the white leghorn produces large, high quality white eggs with unsurpassed eggshell quality.

These birds have excellent rate of production for cage or floor birds and the best feed conversion in the industry and have a quiet temperament even though they are a leghorn!

They are also bred for their disease resistance and are noted for their ability to adapt to most conditions.

Quantities	1-24	25-49	50-99	100+
Unsexed each	\$4.10	\$3.10	\$2.95	\$2.85
Pullets each	\$5.79	\$4.79	\$4.64	\$4.54
Cockerels each	\$2.52	\$1.52	\$1.37	\$1.27

**ORDER
ONLINE!**

Note: In Alberta you may have up to 300 layers without quota.
Check your province for your allowance!

MILLER'S BROWN LEGHORNS

This top quality brown egg layer-hybrid is capable of producing up to 320 large rich brown eggs with strong shells per 52 weeks of production.

The hens are red and roosters are mostly white to buff in colour.

Roosters are a good alternative as a meat bird. To avoid tough meat, butcher at 16 weeks (before maturity).

For best results feed chick starter for 8 full weeks and then grower until the first egg!

Hens will reach 4 lbs live weight. Cockerels 5½ lbs live weight.

Quantities	1-24	25-49	50-99	100+
Unsexed each	\$4.81	\$3.81	\$3.66	\$3.56
Pullets each	\$6.04	\$5.04	\$4.89	\$4.79
Cockerels each	\$3.69	\$2.69	\$2.54	\$2.44

CUSTOMERSERVICE@MILLERHATCHERIES.COM

DUAL PURPOSE - BROWN EGG LAYERS

MILLER'S RED SUSSEX CROSS

A heavy breed cross resulting in hybrid vigor, early maturity, good egg production and a large body size. Producing medium sized lighter brown eggs, they are docile, hardy and pleasant natured hens. The cockerels will look like a Columbian Rock with a slight tinge of red in the feathers. The hens will look like a Rhode Island Red. You can expect that the cockerels will weigh over 6½ lbs and the hens 5½ lbs. Butcher before reaching maturity (16 weeks) to avoid tough meat.

MILLER'S RED ROCK CROSS

This breed is produced by combining Barred Plymouth Rock hens with Rhode Island Red cockerels. Good Layers of light brown medium sized eggs, they are early to mature and have a heavy body size. The hens should weigh 5½ lbs and the cockerels 6½ lbs live weight. Mature hens are black with a reddish gold neck, the roosters are similar to the Barred Plymouth Rocks. Pullet day old chicks are solid black, while the cockerel chicks are black with a white spot on their head. These birds can be aggressive with other breeds. Butcher before maturity!

All layers should receive 8 weeks of starter, followed by grower until the first eggs, then switch to layer ration. Homemade rations must contain poultry supplement. Hens used for breeding should receive a healthy diet!

Quantities	1-24	25-49	50-99	100+
Unsexed Each	\$5.11	\$4.11	\$3.96	\$3.86
Pullets Each	\$6.44	\$5.44	\$5.29	\$5.19
Cockerels Each	\$3.90	\$2.90	\$2.75	\$2.65

YOU MAY ORDER THESE BREEDS STRAIGHT RUN, PULLETS OR COCKERELS!

BARRED PLYMOUTH ROCK

Because of its many good qualities – tasty meat, good egg production, resistance to cold, early feathering, easy management, and good sitting, the Plymouth Rock became the most widespread chicken breed in the United States until the time of World War II. Due to the introduction of industrial poultry farming and the hybrid broiler, it lost popularity. The breed is said to be in recovery, numbering about 24,000 Barred Plymouth Rock worldwide.

COLUMBIAN ROCK

The heaviest of the dual purpose breeds having been around for over 90 years; it now holds the distinction of being one of the hardiest breeds to be found. A good producer of quality brown eggs, they are very quiet and docile birds in the laying pen, good for the yard and have a beautiful colour pattern. Live weight for hens will be approximately 4 lbs at 19 weeks and close to 6 lbs at end of lay. The cockerels can be expected to be approximately 1½ lbs heavier than the hens.

RHODE ISLAND RED

This beautiful, rich brown coloured bird is a fabulous addition to your farm yard for both meat and eggs. The Rhode Island Red is extremely docile and a good dual purpose breed. The hens are hardy, and will lay a good number of dark brown eggs throughout the winter. The roosters make for excellent eating; offering a well flavored non-fatty meat!

We guarantee
85% accuracy on
sexing on all
Dual Purpose
Breeds!

SERVICES

Marek's Vaccine (M): Available for **standard** sized chicken breeds only \$23.00 Min. add 23¢ per bird over 100
Beak Treatment (BT): Available for **standard** sized chicken breeds only \$26.00 Min. add 26¢ per bird over 100
Coccidiosis Vaccine (C): Available for **standard** chicken and turkey breeds \$23.00 Min. add 23¢ per bird over 100
Shipping: \$44.00 Min. add 44¢ per bird over 100 Shipping by **Air:** actual flight cost plus **+\$25 handling**

MAREK'S VACCINATION - Recommended for ALL laying hens. Marek's disease (MD) is an economically significant neoplastic disease of poultry. MD almost devastated the poultry industry in the 1960's but the disease was brought under control after Marek's disease herpes virus (MDV) was identified and vaccines were developed. There is no treatment for Marek's disease, and vaccination of day old chicks is the most dependable way to prevent the disease.

COCCIDIOSIS VACCINE - An effective alternative to anticoccidial drugs, this one-time vaccination delivers protective immunity throughout the life of the bird, improving uniformity and feed conversion. For the vaccine to be effective, chicks must have access to their droppings.

NOTE: Immucox is an alternative to medicated starter. If you should accidentally feed medicated starter in the first 4 weeks, do not stop as the anticoccidial drug in the feed will have killed the vaccine.

You can also find useful information and resources online at: <https://www.alberta.ca/keeping-your-flock-healthy>

THINGS TO NOTE

- Orders for shipping must have a minimum of 25 chicks (for warmth), 20 turkeys or 25 if the turkeys and chicks are combined.
- We recommend Marek's vaccination for all layers.
- Coccidiosis vaccine is recommended if you do not wish to feed medicated feed (i.e. containing an anticoccidial medication). Be sure you can purchase un-medicated feed locally.
- 35 chicks is a difficult number to ship! We recommend 25/30/40 or more. This is a warmth issue!
- Additional charges may apply if a confirmed order is changed or cancelled.
- Should we offer to ship your birds earlier due to a surplus, be sure you are ready before you accept a change.
- Shipments by air are charged actual cost of the flight plus \$25.00 for handling. Air cost is usually around the \$100 minimum varying with airline and distance. We ship Canada wide provided the chicks can arrive in a timely manner.

How do the chicks survive in transit?

The remarkable egg yolk supplied by Mother Nature is absorbed by the chick just before it hatches, supplying it with enough nutrition to go up to 72 hours without food or water. This enables us to ship chicks safely with 100% live arrival guaranteed (excludes extras). With the addition of an electrolyte jelly, we are successfully able to ship to almost any point in Alberta, British Columbia, Saskatchewan and some of Manitoba, through the post office. If you do not have a chick agent in your area, we can ship direct to you, do not hesitate to give us a call. Some areas are more difficult to reach: we will do our best to ship chicks to a town as close to you as possible, safely and at a very reasonable rate. If you have any questions on delivery, give us a call at 1-877-344-2442.

Additional charges may apply if a confirmed order is changed or cancelled

CUSTOMERSERVICE@MILLERHATCHERIES.COM

MILLERS TURKEYS

TURKEYS SOLD AS UNSEXED ONLY!

10 turkeys can be shipped with chicks to make a minimum of 25 total in the same box or 20 turkeys shipped on their own.

NOTE: We cannot guarantee orders of less than 10 turkeys.

WE CANNOT SHIP STARTED BIRDS. BROOD ORDERS WILL BE ACCEPTED FOR PICKUP IN WESTLOCK ONLY.

10 days brooding available!

THE ORLOPP BRONZE

These striking Heirloom turkeys are top quality and have a remarkable flavor!

A beautiful broad breasted turkey, the Orlopp Bronze is the breed that established the premium, niche turkey market in North America. The original bronze line hails from 20th-century England, and were imported by the Orlopp family in 1935.

Faster growing and bigger than the Orlopp Bronze of the past, their feed conversion is excellent, reaching weights of up to 23 lbs for hens and up to 40 lbs for toms at 20 weeks.

The Orlopp Bronze turkey is a strong complement to any farm!

MILLER'S HEAVY WHITE

This white-feathered turkey grows to an exceptional size and has impressively flavorful meat.

Their top feed conversion will give you excellent return on your investment!

Hens at 20 weeks should weigh 20 lbs and over, and

Toms at 24 weeks should weigh 40 lbs and over.

Keeping them warm enough for the first 2 weeks is paramount!

Turkeys are especially sensitive to temperatures, and any chilling goes straight to the joints! Turkeys are harder to get started than chicks. Call us if you need advice, we are happy to help!

This hybrid is fast growing and easy to clean. Excellent value for your dollar!

ARTISAN GOLD

A rare breed that is small in size and slow growing with black feathers, unique coloring in the face and feet, long black legs, and a pronounced beak. The Artisan Gold thrives in a free-range or custom environment where it can express natural tendencies such as roaming and roosting, and offers a robust, gamey taste that is exotically different from traditional turkeys currently in the market.

With its unique and uncommon characteristics, the Artisan Gold is a standout on any farm!

Call or visit our website for 2025 hatch dates

MINI CLASSIC

The MiniCLASSIC is a small, stocky, and robust turkey that has been carefully bred to deliver all of the desirable characteristics that turkeys have historically been appreciated for, offering maximum harvesting flexibility and operational efficiency without sacrificing meat quantity or quality. The MiniCLASSIC thrives in specialized or free-range operations, and is perfect for its convenient-to-cook size that delivers a high quality, succulent taste with appealing table presentation that is perfect for the most prestigious family celebrations.

At 18 weeks, hens should be 16 lbs while toms should be 25 lbs.

Call or visit our website for 2025 hatch dates

ClearH₂O[®]

AquaBeads[®]

**Proprietary Gel Beads for Feed Attractant Top-Dressing
and Hydration Supplementation Applications**

AquaBeads[®] are a ready-to-use, 92% moisture gel bead designed for application as a top-dressing to starter feed at the time of placement to accelerate early discovery of feed and water for improved health and growth performance.

Early Discovery of Feed and Water

The sooner hatchlings discover and start consuming feed and water at placement, the quicker their digestive and immune systems will develop and provide a foundation for strong growth.

The key metrics for poultry producers for early performance—7-day mortality, body weight, gut development, disease resistance, overall livability—are positively impacted by proper hydration and nutrition provided by early access to feed and water.

Clearly Better Quality

- **Nutritional Hydration** – Water gel bead enhanced with electrolytes and betaine to provide both hydration and nutrition supplementation.
- **Highly Attractant** – Green color stimulates attraction to hatchlings to accelerate feed discovery.
- **Contaminant Free** – Commercially sterile and independent laboratory tested.
- **Quality Assurance** – Produced in an FDA approved facility with Certificates of Analysis available at www.clearh2o.com.

Clearly Better Convenience

- **Ready-To-Use** – No measuring, mixing, or addition of water needed for easy and clean administration.
- **Packaging** – 34 lb pail (60 pails/pallet)
- **Shelf Life** – 12 months at room temperature. No refrigeration required if unopened

Available in smaller sizes!

PRICES SUBJECT TO CHANGE WITHOUT NOTICE, PRICES DO NOT INCLUDE TAXES AND SHIPPING.
ALL EQUIPMENT ORDERS ARE SHIPPED FROM SEVEN OAKS MANUFACTURING, RESTOCKING FEE 25%. COPYRIGHT 2025

HERITAGE BREEDS

ALL HERITAGE BREEDS ARE SOLD AS UNSEXED ONLY

Heritage breeds have been selected for their uniformity, rate of lay, docile temperament and utilization as a good lean meat alternative, as well as tolerance of the Canadian climate. Given the chance, they will not only all set, but will be with you for many years! We are unfortunately unable to sex these birds so we cannot be responsible for the rooster to hen ratio. The more you order of a breed the better the chance of balanced numbers. Our vaccinated purebred parent stock produces excellent quality, lively chicks. You can be sure that your chicks are strong and healthy - Our reputation depends on it!

This stock has variable breed uniformity, therefore not considered show quality.

Minimum orders, for warmth, is 25 Chicks.

AMERAUCANAS

This American version of the Ameraucana has tail feathers unlike their rump-less ancestors. Not as big as our other breeds, it is a fine layer of quality large blue-green eggs. Their delightful beards and multicolours have kept it our most popular heritage breed for many years.

BIELEFELDER

The Bielefelder was first developed in the 1970's in Bielefeld, Germany by Gerd Roth. A relatively newer breed known as a "gentle giant" first appearing in the USA in 2011. This breed has a great cold tolerance. They are friendly, calm chickens that produce large brown eggs.

BLACK AUSTRALORP

The Australian equivalent of the Orpington, they are winter hardy, docile and quiet birds. A heavy layer of light brown eggs, they have beautiful black feathering with a greenish-purple sheen and appealing round bodies with an upright 5 point comb.

BLUE ANDALUSIANS

Originally from Spain, they are smallish, active, closely feathered birds that tend to be noisy and rarely go broody. Ideally the plumage should be slate blue with delicate black lacing, but in lots of birds the blue can be various hues and the lacing can be lost. They tolerate heat better than the cold, but need shade to retreat to when it becomes too hot or humid.

BUFF ORPINGTON

Brought to North America in the late 1800's, these birds have broad, smooth fitting feathers on their massive bodies. Excellent temperament, winter hardy and good layers with beautiful pale meat, the Buff Orpington is a top class dual purpose bird.

HERITAGE BREEDS

COPPER MARANS

One of the six recognized Maran breeds in 1932, these birds originated in the town of Marans, France. They are calm, great foragers and fantastic egg layers with the darkest color egg. Hens tend to go broody and are usually attentive and protective mothers.

CUCKOO MARANS

This beautiful dual purpose bird is known for its deep chocolate brown eggs. The Cuckoo Maran has black and white feather colour pattern similar to the Barred Plymouth Rock. Marans are typically calm and friendly, good foragers, do well in cooler climates and can be easy to train. Hens have a tendency to be broody.

NOTE: Maran eggs, often called "Chocolate eggs", range in color from lighter shades of brown to extremely dark brown, some may even present with speckles while others may be more uniform in coloring. The specific color and intensity of brown varies among individual hens due to the parent bird and individual genetic variation.

GOLDEN LACED WYANDOTTE

Created in Wisconsin in the 1880's for people wanting a great utility bird, they are good layers of medium-size, light brown eggs and have a tendency to be broody. They have strong personalities but tend to be docile with their keeper. Very cold hardy with dense feathering and stunning plumage.

LAVENDER ORPINGTON

Orpingtons were originally developed in England in the 1880's, however, the lavender version was bred in 1990's. A good egg layer, they are known to be curious, docile, and intelligent. Cold hardy with a large yet compact body, hens can be broody and will to sit on any egg!

SPECKLED SUSSEX

A lively yet docile breed that can adapt to any surroundings. They enjoy the presence of humans and make delightful pets. The breed frequently goes broody in the warmer months. They are good foragers and are generally a hardy variety for our cold climate.

Additional charges may apply if a confirmed order is changed or cancelled

CUSTOMERSERVICE@MILLERHATCHERIES.COM

HERITAGE BREEDS - BANTAM

SOLD AS MIXED SEX ONLY

All bantams are very sensitive to temperature - especially for the first 2 weeks!

Bantam chicks have tiny bodies and cannot hold their body heat like a Cornish Giant.

95°F/35°C is required for starting these breeds.

TLC must be provided and constant monitoring for the first 48 hours!

We recommend Turkey starter for the first 8 weeks.

WHITE SILKIES

These unusual birds are known for their black skin and hair-like plumage. Having a fifth toe is also an unusual trait. These birds date back to the days of Marco Polo and have remained popular as an excellent setter and for their friendly nature. The whites are the quietest of the silkies. Hens are broody and attentive mothers.

GOLDEN LACED COCHIN

Originally known as "Pekin" bantams these delightful birds arrived from China with returning soldiers around 1860. These stunning birds were admitted into the American Poultry Standard of Perfection from 1874 to 1977. Cochins are heavily feathered down the shanks and toes and appear to be much larger than they actually are. They are very gentle, excellent setters, require little space and are absolutely beautiful to look at. Each feather is rich, golden-laced with lustrous greenish-black creating a broad oval with a golden bay center.

HERITAGE BREEDS & PACKAGES

ALL HERITAGE BIRDS ARE SOLD UNSEXED ONLY

We will do our best to give you a good selection of breeds in your packages, but we cannot guarantee that you will get all the breeds or guarantee show quality.

There are **2 different packages: STANDARD** (Standard) or **ALL BREED** (Standard + Bantam)
(no guarantee of number of breeds/varieties)

10-24:\$9.17 each **25+:\$8.42** each

Additional charges may apply if a confirmed order is changed or cancelled

GAME BIRDS

PHEASANTS AND GUINEA FOWL ARE SOLD UNSEXED ONLY

TEMPERATURE: Guineas and pheasants should be kept at 35°C - 38°C (95°F - 100°F) for the first two weeks, measured at chick height, away from all heat sources in the coldest area of the brooder that the birds can go. Reduce heat by 3°C (5°F) per week after the first two weeks. Changes in temperatures must not exceed more than 2°C (4°F) per day.

FEED: We recommend a high protein 25% - 28% Turkey or Game Bird starter for the first 8 weeks. Switch the birds to a 20% - 26% game bird grower feed from 8 - 16 weeks of age, then further reduced to a 16% layer ration thereafter.

WATER: Use mini drinking bowls to prevent chicks or keets from getting into the water. Provide 1 waterer per 70 birds for a maximum of 7 waterers in the brooder. The waterers should be placed in close proximity to the heat source. Clean your waterers and provide fresh water daily.

NOTE: If the birds are not able to find feed and water, they will either starve out or their growth will be stunted from malnutrition.

BEDDING: We recommend using large wood shavings which generates less dust and lowers the risk of developing mold. Do not use fine wood shavings, straw or poultry peat moss. Bedding should be at least 2 - 4 inches thick, as lack of bedding will cause leg problems. During the first week, take out any wet spots every 3 days and top dress. Completely change as needed. Additionally, we recommend to spread hydrated lime on the clean ground.

VENTILATION: Good ventilation is essential to prevent damp bedding that can result in chilled birds. Proper heat and ventilation balance is necessary for adequate air movement to minimize smell and provide low humidity, while keeping the birds comfortable and warm.

LIGHTING: Consistent low lighting is important to help decrease starve-out, and allows young chicks and keets to find food and water. Lighting should be dimmed after the first seven days as game birds then tend to become very aggressive and cannibalistic.

CHINESE RINGNECK PHEASANTS

The most loved of the meat pheasants in this part of the world. These Chinese descendants continue their popularity due to their good taste and fine looks. Pheasants should be butchered at 22 weeks and will weigh 1.5 - 2.5lbs live.

GUINEA FOWL

These unique birds can be an amazing addition to any homestead!

Guineas are low maintenance, highly social and very vocal birds. They provide excellent pest control and love to forage for mice, beetles, ticks, ants and more! They also provide a natural alarm to alert others when predators are near. Guineas can lay up to 100 eggs in a season with thicker shells and nearly 3 times the protein level of a chicken egg of the same size! KEETS are guinea fowl that are younger than 12 weeks.

Shipped on select hatch days at a minimum of 30 Pheasants or Keets.

Call or visit our website for 2025 hatch dates

QUANTITIES	30-59	60-89	90+
PRICE PER CHICK	\$6.87	\$6.67	\$6.47
30 Pheasants or Keets: \$206.10 plus shipping			

HATCHING & PRE-INCUBATED EGGS

HATCHING EGGS:

Available from the hatchery and may be shipped only if accompanied by chicks for safe handling: Extra **\$10.60** / dozen for freight. We provide you with the same eggs that we hatch in our hatchery. Due to the impact of holding and incubation conditions, there is no guarantee on hatching eggs.

CHICKEN EGGS:

Cornish Giants, White Leghorn, Miller Brown, Rhode Island Red, Red Rock Cross, Red Sussex Cross **\$32.86 / dozen**.

TURKEY EGGS:

Orloup Bronze - **\$87.48** / dozen & White Turkey - **\$62.64** / dozen

PRE-INCUBATED EGGS

Bring nature to the classroom with pre-incubated eggs that are 2 - 3 days from hatching. These are white leghorn eggs that have been candled for fertility and are from breeders tested negative for Salmonella Enteritidis.

Pick up in Westlock and Edmonton only \$53.00/dozen

Additional charges may apply if a confirmed order is changed or cancelled

BROODING EQUIPMENT

BROODER THERMOMETER
(614)...\$12.00 Each
Extra heavy flanged metal
back, white enamel,
non-mercury

*An essential part of your
temperature control!*

**Available at half price with the
purchase of baby chicks!**

BROODER GUARD:

(1835)...\$19.30 Each
(35' long & 18" high)

(1235)...\$15.60 Each
(35' long & 12" high)

Gives chicks and poults room to
exercise but confines them to brooding
area. Stops drafts, crowding and piling.
Confined area is easily enlarged.

INFRARED HEAT BULB:
R40/10/2...\$27.50 Each
2 Bulb per pack
250 watt - 110 volt
multipurpose heat bulb

4 LAMP BROODER

Brower (208-CB)...\$251.50 (WHILE SUPPLIES LAST)

Kuhl (208-C)...\$245.90

Supplies enough heat for 325 chicks or 250 poults.
2 stage thermostatic control turns heat bulbs on/off
in stages to distribute even heat at chick level.

SINGLE LAMP BROODER
(HL-A8)\$42.10 Each

SINGLE LAMP BROODER
(HL-SA8).....\$54.90 Each
with High/Low Switch.
bulb sold seperately

NATURAL GAS AND PROPANE BROODER:

(47JNS)...\$645.50 Each
Thermostatically controlled fuel efficient
gas brooder heats up to 1000 chicks.
The pilot is draft resistant and the gas
valve has an automatic safety shut-off .
Available in Propane or Natural Gas

CHICK AND QUAIL BROODER: GQF Brooder (0534)...\$510.90

An electric brooder for baby poultry or quail. Capacity 125 day-old chicks and up to 50 four week
olds. Quail capacity-100 to fourth week. Use in any building where temperature does not fall below
60°F. Sliding poly mesh door panels on front and one side. Includes 3 litre poly bottle drinker and 580
cubic inch poly capacity feeder. Both feeder and drinker fill from outside. Brooder has ½" PVC coated
wire floor. Dropping pan easily removed for cleaning. Thermostatic control, 500 watts.
Overall size 32"W x 38"L x 12"H. 110V ac only.

PROCESSING EQUIPMENT

1 KILLING CONES

Made from 26 gauge galvanized steel. A very practical item for restraint at slaughter, made in two sizes: Prevents bruising of wings when birds are prepared for dressing.

CHICKEN SIZE (D-72)....\$39.80

TURKEY SIZE (D-73)....\$67.70

2 POULTRY PLUCKER KIT

Make your own poultry plucker. We will supply you with the component part kit. Includes 7" diameter steel drum, 28 rubber fingers, shaft and bearings, 2 pulleys and V-belt. Build your own cabinet. (PP-K)...\$297.50

Poultry plucker motor only (PP-M)..\$239.90

Buy motor with kit & price of the motor will be.....\$224.90

3 POULTRY PLUCKING FINGERS

Heavy duty rubber fingers do the best job possible.

3" plucking finger. (PPF-3)...\$2.40

5" plucking finger. (PPF-5)...\$2.40

4 POULTRY KILLING KNIFE

Overall length 7½", blade length 3½", point is sharp on both sides.

(KK-128)....\$42.80

5 FEATHER-OFF

A special compound developed to aid in removing the feathers of chickens, fowl, ducks, geese, turkeys and game birds. 340g.

(F-12).....\$7.40

6 LUNG REMOVER:

Turkey (T-LUNG)....\$95.20

Chicken (M-LUNG)....\$87.50

7 CHICKEN LEG CATCHER

Catches chickens quietly without danger or exciting hens.

Sure catch - holds leg tight with loop hook.

Over-size charges apply to mail.

(635)....\$19.10

These units make butchering day a breeze! Producing pin free smooth finish in seconds per bird.

These are exceptional tools for the serious enthusiast. Miscellaneous parts may be special ordered at your request.

THE FEATHERMAN PRO PLUCKER:

Simply scald chickens, then drop 4 or 5 birds into the tub.

In 20 seconds or less the birds will be picked clean.

No pin feathers, no backache.

Capacity: 50 pounds of birds, optimum 30 pounds, Tub diameter: 22 inches,

Height: 33 inches, Footprint: 25 x 28 inches, Weight: 125 lbs.

Motor: 1 hp 115 Volts. Made in USA.

Chicken Plucker (PRO-P).....\$3,680.30

Turkey Plucker (PRO-T).....\$4,619.80

Dunker Shackles (PRO-DS).....\$ 919.20

THE FEATHERMAN SCALDER

The goal: No pin feathers. Period! The Featherman Scalding holds a constant water temperature to help you achieve that perfect scald. Made of 16 gauge stainless steel with a 100,000 BTU propane burner, temperature control within a five degree range, and sized for four birds at a time (40 gallon), the Featherman Scalding delivers maximum performance at a minimum price. Drain valve, full protective rim, side-mounted chimney and cover tarp are all standard features. One year complete warranty. Made in USA. (PRO-S).....\$3,587.40

SPORTSMAN INCUBATOR / HATCHER

The **1502 SPORTSMAN** incubator offers an accurate digital thermostat with LCD display of temperature and humidity. An on-board computer monitors systems and the environment every second to keep itself updated and to share this data with you. Electronic egg turning control, audio/visual indicators and a standard easy view door highlight a number of standard features. This is a complete incubator and hatcher. In addition to having three automatically turned racks, it has a hatching tray in the bottom of the incubator. (1502E).....\$1,577.60

The **1550 HATCHER** is designed to allow for the best hatching conditions. Unlike setting incubators, hatchers usually operate at slightly different temperature and humidity settings to obtain optimum hatch. It can be used to set eggs, but each egg will have to be turned by hand. For small chicks such as quail, each hatching tray comes with a tray cover except for the bottom drawer. An on-board computer monitors systems and the environment every second to keep itself updated and to share this data with you. (1550E).....\$1,480.90
