The faces of Miller Hatcheries:

S L Morantz, Max Weiner, a very young Howard Lutz and Howard and Debbie Lutz today ; Candy Keshwani

Dear poultry enthusiasts,

As we enter our 103rd year hatching, we are happy to share with you, our 2020 lineup of poultry and equipment.

With the great pace of change our planet is undergoing, it is up to all of us to play our part by reducing waste. There are many ways to be more self-sufficient, reduce waste in our homes and in society. We all need food –but we don't need it wrapped in vast quantities of plastic shipped from the other side of the world. We are glad to be your partners in growing our own food and supplying locally sourced food.

You can be sure that when you buy from us, the effort put into supplying you with high quality chicks from breeders that are selected for excellence, backed up by constant monitoring for health status and confirmed by testing both at the barn and the hatchery, are second to none! We continue to observe the highest bio-security for the hatchery and farm so that you may order from us with complete confidence.

For our Alberta customers: You may recall that the Alberta Chicken Producers (ACP), attempted to impose rules that would have placed significant barriers on the rights of Albertans to purchase chicks. We referred our joint concerns to the Government body regulating the Marketing Boards, which ruled in our favour. As a result, your access to chicks, remains unaffected.

I would like to take this opportunity to thank you for your continued support and wish you all the very best for a wonderful 2020 growing season!

Yours sincerely,

Candy Keshwani, President

PREPARING YOUR BROODER ROOM

BEFORE YOUR CHICKS ARRIVE:* At least a week before your chicks arrive, not the night before, prepare your coop. Thoroughly clean and disinfect your brooder area from top to bottom. We recommend VIRKON for disinfecting. Be sure to include all the equipment, walls, ceiling and floor. Allow the area to dry completely to avoid mold.

*Clean thoroughly & disinfect all feeders, waterers and brooder lamps.

*Use an absorbent bedding like shavings, poultry peat moss or straw. At least 4 inches packed down -NOT newspaper! Make the surface as level as possible especially for turkeys who may fall into a dip and not be able to right themselves.

*At least 24 hours before the chicks arrive, the area should be pre-warmed and temperatures checked at chick height. Check for cold spots and drafts and be sure the area surrounding your brooder is also warm around 75° F/24° C. Put out the feed. Hold off on putting the water out until just before the chicks arrive; the water needs to be cold so the chicks do not climb into it.

*Eliminate drafts by repairing windows and doors. Plastic is no substitute for insulation! Do not seal off all air flow either. Good ventilation is essential for a dry brooder house and healthy chicks!

*Carbon dioxide and ammonia, if present in the house, tend to sink to the floor, displacing oxygen. This low oxygen level at the floor may ultimately result in long term health problems such as ascites.

*Check that all your equipment is ready & working. Night time lows can be deceiving, using a hi-low thermometer will eliminate a lot of heartache by enabling you to check the night time temperatures.

*Feed and water must be within the comfort zone of the chicks and available for the chicks at all times. Clean waterers frequently and place them on slatted or wire platforms so birds will be kept away from the wet floor. A good crumble, not pellets or mash, will encourage uniform distribution of nutrients and give the chicks a good start. If you are adding anything to their water be sure to mix it fresh daily.

*When your chicks arrive they need to stay close to the heater so use corrugated cardboard or an 18" plywood wall to keep them restricted. Make sure your corners are rounded off so they cannot pile into them.

*Maintain a temperature of 95° F/35° C for turkeys: chicks should start at 90° F/32° C, furthest from the heat source, for the first week reducing by 5°F a week until 70°F is reached.

*When your chicks arrive, the first 2 hours are critical. They need to recover and adjust to their surroundings. It is after this settling in time that you should reassess their environment.

*Watch closely to see if the chicks are (a) too cold, crowding under the brooder; or (b) too hot, staying on the outside wall away from the heat source. Overheated, standing with their wings out like propellers or even lying down gurgling or with bubbles coming out of their mouths.

*If infra-red heat lamps are used, raise the lamps when chicks appear to be too warm. Normally lamps should be set 18 inches high the first week and should be raised approximately three inches each week, providing they remain comfortable.

*Keep litter dry. This is important to prevent Coccidiosis and other diseases. Remove only wet spots to minimize disturbance of mold and bacteria from the litter into the air.

*Feed 20% to 23 % protein chick starter for 3 weeks for broilers, 8 weeks for layers. Turkeys should get a 25% for 8 weeks. Then change to a 16% to 20% protein grower. This can be mash or crumbles. During the growing period, you should have a coccidiostat in the feed. If mixing your own feed, be sure to use a poultry supplement concentrate. Do not dilute a complete feed.

TEMPERATURE - TEMPERATURE - TEMPERATURE CHILLING IN THE FIRST 48 HOURS OF BROODING:

Chicks do not have the ability to control their body temperature completely until they are 2 weeks old.

Floor temperature and insulation will mean more to the chicks during this time than the air temperature. The chicks need at least 3 - 4 inches of FLUFFY DRY litter to provide protection from the cold floor.

To maximize immunity, performance and livability, the barn floor temperature should be 90°- 92° F / 32°C- 34° C. This will create a comfort zone for the chicks. The feeders and waterers should also be in this comfort zone. **A cold chick** will huddle for warmth, & in so doing, **will not eat and drink**. This will result in heavy losses due to starving out at around 4 days tapering off at 7 days. Continued losses throughout the growing period suggest that it is as a result from chilling at some point of the growing period. If your chicks appear chilled on arrival, keep them under a lamp in the house until they have fully recovered. In order to maintain body temperature, add and adjust heat lamps accordingly! Consistent heat, food, water and good quality air will result in consistent growth. The use of antibiotics in the water may be appropriate for chilled chicks to assist in recovery and to prevent long term effects-speak to your veterinarian. Be sure to read all expiry dates & withdrawal times on any medications or vitamins.

MILLER'S CORNISH GIANTS

Lipsmacking good!!!!!!

mmmmmm....chicken!!!!

-This is the bird that can give you almost 1lb of gain for 2 lbs of feed
 -While the hens gain rapid breast meat, the roosters gain bone structure first and then fill out. Both provide good, even, high quality meat.
 -These birds have been bred for the table. They are not recommended as a layer. Grow up to 2000/year in Alberta without quota and you have the potential of a good return on your investment.

Recommended Feeding

Day 1 to week 3 - 20-23% Protein Chick Starter (medicated unless you have had your birds vaccinated against Coccidiosis.)

Week 3 onwards-16-18% Chick Grower. Mix starter and grower gradually over a week.

You may put them on finisher or a homemade chop for the last 2 weeks before processing. Be sure they do not receive any medication for the 2 weeks prior to processing.

Note: Meat birds cannot attain proper weights on a diet solely consisting of farm grains and scraps. Always add protein supplement to farm grains or feed a recommended complete feed.

MILLER'S CORNISH GIANT PULLETS

- Excellent feed conversion
- Higher white meat yield
- More profitable

- Have the best of both worlds.
- Raise birds that are bred for meat and still finish anywhere from 4 pounds and up.
- Less problems than unsexed broilers
- Well developed breast meat
- Excellent even growth
- Best for fryers
- Cornish Giant pullets are becoming the choice of more and more family farm producers each year.

***USE CORNISH GIANT PULLETS FOR CORNISH GAME HENS AND BUTCHER AT 4 WEEKS!**

Quantities	100	50	25
Mixed Sex each	\$259.00 \$2.59	\$134.50 \$2.69	\$71.00 \$2.84
Pullets each	\$319.00 \$3.19	\$164.50 \$3.29	\$86.00 \$3.44
Cockerels each	\$289.00 \$2.89	\$149.50 \$2.99	\$78.50 \$3.14

Add \$1.00 per chick per breed for orders less than 25 per sex

MILLER'S WESTERN RUSTIC

GREAT ALTERNATIVE TO THE CORNISH ROCK GIANT

Breed Characteristics

- Rustic is a far hardier breed compared to an industrial broiler
- Yellow skin, tasty meat
- Nice barred red plumage
- Strong yellow legs
- Well-adapted to barnyard farming conditions
- More resistant to disease
- Average live weight at 9 weeks 5.5lbs and at 12 weeks 7- 8 lbs!

Colours may vary

Quantities	100	50	25
Mixed Sex each	\$376.00 \$3.76	\$193.00 \$3.86	\$100.25 \$4.01

Add \$1.00 per chick for orders under 25

As the commercial broiler becomes unsuited to the backyard flock environment, here is a proven first rate alternative!

CUSTOMERS ARE THRILLED WITH THIS TASTY ALTERNATIVE

INFORMATION AVAILABLE AT www.millerhatcheries.com ORDER ONLINE!

STARTED CHICKS AND POULTS

AVAILABLE FOR PICKUP ONLY AT WESTLOCK LOCATION. WE CANNOT SHIP STARTED BIRDS.

- For people who may not have the proper facilities to raise chicks and turkey poults, we are pleased to brood. Our brooder rooms are ventilated and heated to the proper temperatures.
- We are equipped with special battery brooders that have auxiliary electric heaters to do the job properly.
- For brooding baby chicks the cost is 20¢ per day per chick.
- For brooding turkey poults the cost is 20¢ per poult per day. MIN 10 DAYS.
- Minimum brooding charge is \$20 per order

Four week old Cornish Giants are available for sale from April through June .

If you do not have the brooding facility but would still like to finish your own birds this is your chance.

There will be several available dates. We will start taking bookings in February.

Orders are for pickup at FARM ONLY (location near Westlock to be announced). Crates for transporting may be borrowed for a deposit of \$200 per crate. Deposit will be returned to you when the crates are returned clean within 3 business days. There is a charge of \$12 per crate if returned unclean.

Phone for prices and further information. Call (780) 349-6636

If you are not using our crates you **must have** something to **properly** transport your birds in!

MILLERS BROWN LEGHORNS

MILLERS BROWN LEGHORNS

- Top Quality Brown Egg Layer-Hybrid.
- Capable of producing approximately 320 eggs per 52 weeks of production.
- Very calm & docile layers that produce large rich brown, strong shelled eggs.
- Hens are red and roosters are mostly white to buff in colour.
- Hens will reach 4 lbs live weight. Cockerels 5-1/2 lbs live weight.
- Roosters are a good alternative as a meat bird. To avoid tough meat, butcher at 16 weeks before maturity.
- For best results feed chick starter for 8 full weeks and then grower until the first egg!

www.millerhatcheries.com

Add \$1.00 per chick per breed for orders less than 25 per sex

Quantities	100	50	25
Mixed Sex each	\$272.00 \$2.72	\$141.00 \$2.82	\$74.25 \$2.97
Pullets each	\$368.00 \$3.68	\$189.00 \$3.78	\$98.25 \$3.93
Cockerels each	\$188.00 \$1.88	\$99.00 \$1.98	\$53.25 \$2.13

Very clean birds laying early in the day for easy egg collection

Hybrids require 18% layer ration to maintain vigor & avoid picking, egg eating and cannibalism

MILLERS WHITE LEGHORNS

MILLERS WHITE LEGHORNS

- North America's most popular white egg layer-Hybrid
- Produces large white eggs
- Unsurpassed eggshell quality
- Excellent rate of production for cage or floor birds
- The best feed conversion in the industry
- Quiet temperament even though they are a leghorn!

Note: In Alberta you may have up to 300 layers without quota. Check your province for your allowance!

Additional charges may apply if confirmed order is changed or cancelled

Marek's vaccination is recommended for ALL layers
Coccidiosis vaccine is recommended for the organic farmer

DUAL PURPOSE

NO. 1

RED SUSSEX CROSS

MILLER'S RED SUSSEX CROSS is a heavy breed cross resulting in hybrid vigor, early maturity, good egg production and a large body size.

- * Produces lighter brown eggs of medium size.
 - * The cockerel will look like a Columbian Rock with a slight tinge of red in the feathers, while the hen will look like a Rhode Island Red. Very quiet pleasant hens.
 - * You can expect that the cockerel will weigh over 6-1/2 lbs. and the hen 5-1/2 lbs.
 - * Butcher before reaching maturity (16 wks) to avoid tough meat.
 - * You will really enjoy a flock of MILLER'S RED SUSSEX CROSS; They are docile, easily maintained, hardy and pleasant natured!
- All weights indicated are approximate live weight!

Yum!
The

RED ROCK CROSS

MILLERS RED ROCK CROSS

is produced by combining Barred Rock hens with Rhode Island Red cockerels.

- * We know you will be pleased with the hybrid vigor, early maturity, high egg production and heavy body size.
- * The pullets should weigh 5-1/2 lbs and the cockerels 6 1/2 lbs live weight. Butcher before maturity!
- * These birds can be aggressive with other breeds.
- * Mature hens are black with a reddish gold neck. Roosters are similar to Barred Rocks. Pullet day old chicks are solid black, while the cockerel chicks are black with a white spot on their head.
- * Good Layers of light brown medium sized eggs.
- * All layers should receive 8 weeks of starter; followed by grower until the first eggs, then switch to layer ration.
- * Homemade rations must include poultry supplement.

HERITAGE BREEDS

BARRED PLYMOUTH ROCK

Plymouth Rock was first shown in Boston in 1849, but was then not seen for another twenty years and was later added to the Standard of Excellence of the American Poultry Association in 1874. The barred plumage pattern was the original one; other colours were later added.

Because of its many good qualities – tasty meat, good egg production, resistance to cold, early feathering, easy management, good sitting – the Plymouth Rock became the most widespread chicken breed in the United States until the time of World War II, followed by the introduction of industrial poultry farming and the hybrid broiler when it lost popularity. The breed is said to be in recovery, numbering about 24,000 Barred Plymouth Rock worldwide.

COLUMBIAN ROCK

This is the heavier of the dual purpose breeds and has been around for 40 years. It now bears the distinction of being one of the hardest breeds to be found.

These birds have a beautiful colour pattern.

They are a good producer of quality brown eggs, a very quiet and docile bird in the laying pen, and good for the yard.

Heavier than hybrids, live weight will be approximately 4 lbs. at 19 weeks and close to 6 lbs. at end of lay for females. Males are approximately 1½ lbs. heavier.

**DO YOUR PART IN
MAINTAINING THESE
HERITAGE BREEDS!**

**CAPABLE OF 300 EGGS
IN 52 WEEKS OF LAY!**

**YOU MAY ORDER THESE
BREEDS STRAIGHT RUN,
PULLETS OR COCKERELS**

Pullets each	\$508.00 \$5.08	\$259.00 \$5.18	\$133.25 \$5.33
Cockerels each	\$259.00 \$2.59	\$134.50 \$2.69	\$71.00 \$2.84

RHODE ISLAND RED

Millers Rhode Island Red: This beautiful rich brown coloured bird is a fabulous addition to your farmyard for both meat and eggs. The Rhode Island Red is extremely docile and a good dual purpose breed. The hens are hardy, and will lay well throughout the winter a good number of dark brown eggs. The roosters make for excellent eating, well flavored non-fatty meat!

HERITAGE BREEDS

DUAL PURPOSE & HERITAGE ASSORTMENT

Dual purpose chicks that have not been sold breed specific will be combined for packages. These will be compiled of one or more of the 5 dual purpose & heritage breeds!

BREED CHOICE NOT AVAILABLE FOR THIS PACKAGE

guaranteed 85% accuracy on sexing!

MAREK'S VACCINATION is recommended for ALL laying hens. Marek's disease (MD) is an economically significant neoplastic disease of poultry. MD almost devastated the poultry industry in the 1960s but the disease was brought under control after Marek's disease herpes virus (MDV) was identified and vaccines were developed. An ounce of prevention!....there is no treatment for Marek's disease.

COCCIDIOSIS VACCINE – is an effective alternative to anticoccidial drugs. This one-time vaccination delivers protective immunity throughout the life of the bird, improving uniformity and feed conversion.

NOTE: Immucox is an alternative to medicated starter. If you should accidentally feed medicated starter in the first 4 weeks, do not stop as the anticoccidial drug in the feed will have killed the vaccine. Also, for the vaccine to be effective, chicks must have access to their droppings.

You can also find useful information and resources online at: alberta.ca/small-flock-poultry.aspx

How do the chicks survive in transit?

The remarkable egg yolk supplied by Mother Nature is absorbed by the chick just before it hatches, supplying it with enough nutrition to go up to 72 hours without food or water. This enables us to ship chicks safely with 100% live arrival guaranteed (excludes extras). With the addition of an electrolyte jelly, we are successfully able to ship to almost any point in Alberta, B.C., Saskatchewan & some of Manitoba, through the post office. If you do not have a chick agent in your area, we can ship direct to you, do not hesitate to give us a call. Some areas are more difficult to reach: we will do our best to ship chicks to a town as close to you as possible, safely and at a very reasonable rate. If you have any questions on delivery, give us a call at 1-877-344-2442.

Simple brooder set up

ARE YOU READY FOR YOUR CHICKS TO ARRIVE

- Make a corrugated cardboard ring approximately 6-8' in diameter.
 - Pack at least 4" of dry bedding in and around the circle
 - Add heat lamp just off center, 2 feeders and 2 waterers for 50-100 chicks
 - Place thermometer furthest from heater that chicks can reach at chick height. Temperature should be 90°F-95°F/32°-35°C
- Allow 0.5 square foot per chick

MILLERS HEAVY WHITE TURKEYS

ORLOPP BRONZE TURKEYS

MILLER'S HEAVY WHITE TURKEYS!

This white-feathered bird grows to an exceptional size and has superb flavorful meat with top feed conversion. Excellent return on your investment. Buy with confidence – you are getting really good value for your money. Raise as many as you can – fill up your freezer. Turkeys are harder to get started than chicks, call us if you need advice – we will be pleased to help.

Keeping them warm enough for the first 2 weeks is paramount & any chilling goes straight to the joints!

Hens at 20 weeks should weigh 20 lbs. and over.
Toms at 24 weeks should weigh 40 lbs. and over.

This hybrid is fast growing and easy to clean. Excellent value for your dollar!

In Alberta you may raise up to 300 turkeys in a year without quota. It is necessary to fill out a registration form if you wish to grow more than 90 in Alberta. In British Columbia a permit is required to raise more than 50. The limit in Saskatchewan is 99.

TURKEYS SOLD AS MIXED SEX ONLY

NOTE: We cannot guarantee orders of less than 10 turkeys. 10 turkeys can be shipped with chicks to make a minimum of 25 total in the same box or 20 turkeys shipped on their own.

WE CANNOT SHIP STARTED BIRDS. BROOD ORDERS WILL BE ACCEPTED FOR PICKUP IN WESTLOCK ONLY.
10 days maximum brooding!

Quantities each	Min 10	25-49	50-99	100+

THE ORLOPP BRONZE TURKEY

Taste the difference! These striking birds have a unique flavor, absolutely delicious!

A premium broad breasted turkey, their feed conversion is very good reaching weights of up to 23 lbs for Hens and up to 40 lbs for Toms at 20 weeks.

www.millerhatcheries.com

orders are subject to our terms and conditions

HATCHING EGGS

Are available from the hatchery and may be shipped only if accompanied by chicks for safe handling: Extra \$6.25/dozen for freight.

CHICKEN EGGS - Broiler, Leghorn, Miller Brown, Rhode Island Red, Red Rock Cross, Red Sussex Cross or a "School Mix" - **\$25/dozen.**

TURKEY EGGS: Orlopp Bronze - **\$75/dozen** & White Turkey - **\$52/dozen**

We provide you with the same eggs that we hatch in our hatchery. Due to the impact of holding and incubation conditions, there is no guarantee on hatching eggs.

PRE-INCUBATED EGGS

Bring nature to the classroom with pre-incubated eggs that are 2-3 days from hatching. These are white leghorn eggs that have been candled for fertility and are from breeders tested negative for Salmonella Enteritidis. **Pick up in Westlock and Edmonton only. \$38/dozen**

- Orders for shipping must have a minimum of 25 chicks (for warmth) or 20 Turkeys or 25 if the 2 are combined.
- We recommend Marek's vaccination for all layers.
- Coccidiosis vaccine is recommended if you do not wish to feed medicated feed (i.e. containing an anticoccidial medication). Be sure you can purchase un-medicated feed locally.
- 35 chicks is a difficult number to ship! We recommend 25/30/40 or more. This is a warmth issue!
- Additional charges may apply if a confirmed order is changed or cancelled.
- Should we offer to ship your birds earlier due to a surplus, be sure you are ready before you accept a change.
- Shipments by air are charged actual cost plus \$15 for handling. Air cost is usually around the \$50 minimum varying with airline and distance. We ship Canada wide provided the chicks can arrive in a timely manner.

TO PREVENT THE SPREAD OF DISEASE we suggest the following precautions

- Biosecurity is essential to control diseases such as I.L.T.(Infectious Laryngotracheitis). The essential elements of biosecurity include the following:
 - Maintain clear separation between different animals and age of flocks. Between flocks change into dedicated boots and coveralls.
 - Preferably do not allow other people to enter your barns. If people must enter your barns, they should use boots and coveralls that you provide, or be able to assure you that they have not been on another poultry farm for the past two weeks.
 - Use disinfectant boot dip to help control disease. Change the dip frequently (daily). Remember disinfectant will only work if all organic matter is removed first.
 - Do not visit other poultry operations unless necessary. Shower, change your clothes and disinfect your boots and clothing before using them in your own barns.
 - Limit vehicle traffic on your farm site to reduce the chances for contaminations that you may track into your barns.
 - Dispose of dead birds appropriately and avoid scavenging. Consult the Disposal of Dead Animals Regulation for complete information.
 - Perform thorough cleaning and disinfection between flocks. The ILT virus can survive for a long time in a carcass, especially if the carcass is frozen. The virus dies quickly when exposed to sunlight or disinfectants. Virocid is a proven disinfectant against ILT.
 - Rodent control is essential as they can bring and spread disease.

Keep yourself and your family safe

- Did you know that even healthy birds, their eggs, and meat can all be sources of bacteria that can make you sick? With some basic hygiene and handling practices, you and your family can care for your birds safely.
- All live poultry can carry harmful bacteria. These bacteria can spread to you from a bird, its droppings, or anywhere the bird or its droppings have been – including children's toys and equipment.
- Children under 5, the elderly, and people with weakened immune systems are more at risk. They should avoid contact with live poultry as much as possible.

Tips for safe handling of chicks and live poultry

- Wash your hands with soap and water right after touching your birds or anywhere they've been. Use hand sanitizer until you have access to soap and water.
- Adults should help children wash hands.
- Don't nuzzle or kiss your birds. Don't touch your face or eat or drink around live poultry.
- Keep your birds as well as equipment used when caring for birds outside your living space, as well as clothing, footwear, and equipment used when caring for your birds.
- Purchase your chicks from a registered, health-monitored hatchery.

Brooding Equipment

BROODER GUARD: Gives chicks and poults room to exercise but confines them to brooding area. Stops drafts, crowding and piling. Confined area is easily enlarged.

No. 1235, 35' long, 12" high, each **\$11.50**
No. 1835, 35' long, 18" high, each **\$14.70**

4 LAMP BROODER -

Supplies enough heat for 325 chicks or 250 poults. 2 stage thermostatic control turns heat bulbs on/off in stages to distribute even heat at chick level

Brower. (208-CB).. **\$216.80**
Kuhl (208-C) **\$144.40**

BROODER THERMOMETER

Extra heavy flanged metal back, white enamel, non-mercury

No. 614 Each..... **\$11.00**

Available at half price with the purchase of baby chicks!

GAS OR PROPANE BROODER

- Burner is designed to save fuel. Designed to produce heat more efficiently with less gas consumption, due to the

unique 2-point infrared heating unit. Infrared rays are produced at the ribbon burner and ceramic and become heat only on contact with chicks, litter or equipment. CGA approved. 1000 chick capacity. Galvanized 34" canopy, one piece lifetime ceramic, stainless steel burner. Available in Propane or Natural gas

No. 47JLS & 47JNS. Each **\$477.80**

BEDDING

At least 4" of packed straw or shavings. Be sure it is prewarmed in the brooder area.

Straw is not recommended for turkeys

Each..... **\$48.20**

RED BULBS No.R40/10/2. (2/pkg)

Each..... **\$ 26.70**

Ambient heat. It is often overlooked that the temperature under the heat lamps can be nice and toasty but if the surrounding area is not sufficiently warmed the temperature will (1) drop at night when you are not there to see it and (2) not allow the birds to sufficiently move around. If they spend all their time under the heat lamps to stay warm then they are not moving around finding feed and water. Have a back up heater; keep the surrounding area at 75°F or warmer. The area the chicks are occupying should not be below 85°F-95°F depending what you are starting. Measure the temperature at the furthest point from the heat source the chicks can go and at chick height!

CHICK AND QUAIL BROODER: An electric brooder for baby poultry or quail. Capacity 125 day-old chicks and up to 50 four week olds. Quail capacity-100 to fourth week. Use in any building where temperature does not fall below 60°F. Sliding poly mesh door panels on front and one side. Includes 3 litre poly bottle drinker and 580 cubic inch poly capacity feeder. Both feeder and drinker fill from outside. Brooder has 1/2" PVC coated wire floor. Dropping pan easily removed for cleaning. Thermostatic control, 250 watts. Overall size 31"W x 36"L x 14"H (interior height 9"). 110V ac only. 54 lbs.

No. 2109 - Plastic 9/16" Leghorn \$10.50

No. 2111 - Plastic 11/16" Heavy Breed \$11.50

No. 2112 - Plastic 3/4" Ducks \$11.50

No. 2114 - Plastic 7/8" Turkey Hens/Geese \$13.00

No. 2116 - Plastic 1" Turkey Toms \$13.00

NUMBERED BANDETTES ARE AVAILABLE - in packages of 25

STOP PICK

Helps stop cannibalism by smearing Stop Pick on injured birds plus about 10% of flock. It is distasteful to birds and they stop picking.

No. SP-170 170ML each \$13.50

Do not use on open wounds!

Be considerate of your birds:

Vaseline is recommended for open wounds; check your light, feed and temperature for the cause of the picking.

CHAMPION POULTRY CRATES

Rugged stackable crates will stand up to years of use. Holds approximately 20 leghorns, 10-12 broilers. 38"x22.5"x10" ships unassembled for economical shipping!

NO. CRATES-WQ

each 1-5 pieces \$80.60

each 6 or more \$72.50

FLY RELIEF DISPOSABLE BAG

Attract and kill flies safely. Special attractants work wonders without the use of insecticides making this product an environmentally safe control. This 1 gallon trap comes with an attractant inside. **No. GFRT \$15.50**

**INCREASE YOUR TURKEY FERTILITY
WITHOUT HARMING YOUR HEN!**

TURKEY SADDLE: As you know we do not do anything to stop our turkeys from breeding. They are just really bad at it! This handy hen saddle is a must to protect your hen and give leverage to your Tom. **\$13.20**

COOL LITE EGG CANDLER

Has five foot electric cord. Easy to move over eggs for long periods. Eggs need not be handled. **No. 9046 \$21.20**

CHICKEN LEG CATCHER

Catches chickens quietly without danger or exciting hens. Comes in handy for pulling down branches when picking fruit. Sure catch: holds leg tight with loop hook. Over size charges apply to mail. **No. 635 \$10.85**

Incubators

HOVABATORS

ELECTRONIC THERMOSTAT HOVA-BATOR INCUBATOR

Extremely reliable and easy to use! Simply plug it in, add water and eggs! It is pre-set for bird eggs, so there is no adjustment to make, & you enjoy consistently great hatches. It comes with a plastic, easy to maintain liner. Turners are available to hold 41 large chicken/duck eggs or 120 quail eggs. This is a must for any bird enthusiast

Electronic Incubator NO. 1588 \$218.80

12v Circulating Air Incubator with 2 small windows NO. (2365) **\$138.80**

110v Window Top Turbofan circulating air incubator NO. (1583) **\$150.30**

Auto Egg Turner 41 chicken, 120 quail eggs NO.(1610) Universal and quail racks **\$73.40**

Auto Egg Turner 41 chicken eggs. NO.(1611) Universal racks **\$62.40**

Auto Egg Turner 12/16 goose eggs. NO.(1614) Universal racks **\$62.40**

Power Failure Alarm NO.(8380) **\$30.50**

REPLACEMENT PARTS FOR HOVABATORS:

Turner Motor (1655) **\$39.10**

Thermostat Microswitch (3006). **\$13.80**

Thermostat switch with wafer.(3122) **\$33.90**

Wafer (3007) **\$12.00**

Plastic Thermometer (1825) **\$7.40**

Pilot Light (3017) **\$8.10**

Turbo fan complete (2364) **\$49.20**

Plastic Grid Door (1649) **\$12.00**

Replacement turner racks set of 6

Quail (1686) **\$19.55**

Universal (1696) **\$19.60**

Hovabator Incubators are highly reliable for an economical incubator, with a "proven track record". Loosing one set of eggs would more than offset the cost of buying cheaper similar incubators.

SPORTSMAN

For the serious enthusiast!

OUR GUARANTEE!

1. Shipping date specified is only approximate. Actual shipping date will govern – unless otherwise notified. Please arrange to pick up your chicks immediately upon arrival.
2. We guarantee 100% live arrival at the destination site (excluding extras). If there are any dead, over the number of extras included, notify us or our agent immediately for an adjustment.
3. We guarantee 85% accuracy on all our sexed orders. Any sexing errors in chicks should be reported as soon as sex can be accurately determined. (approx. 8 weeks old).
4. We guarantee that all champion chicks are produced from eggs supplied by strong, healthy, government registered breeding flocks. Poultry can still carry germs and pass them to their chicks. We cannot assume responsibility for any disease outbreaks after the chicks leave our premises.
5. While we exercise every precaution in filling orders, we cannot for any reason whatsoever, be responsible to any greater extent than the invoice value of the chicks in question.
6. All orders are accepted subject to strikes, floods, disease outbreaks, acts of god, or delays beyond our control.
7. Our guarantee extends only to the original purchaser identified on the invoice.
8. Please be on hand and take delivery without delay when the shipment arrives. Provide proper brooding and rearing conditions and these champion chicks will live and grow and you will have both pleasure and profit from them.
9. All sales are F.O.B. Westlock

All orders F.O.B. Westlock Broodered birds pick up at 9420 109 Street, Westlock AB T7P 2R4

Shipping by mail works! Live baby chicks can be shipped most economically via parcel post to almost every point in Alberta and parts of B.C., Saskatchewan & Manitoba. We are sorry, due to shipping regulations we CANNOT SHIP BROODED BIRDS.

For SHIPPING BY AIR charges will be actual cost plus \$15 for handling.

Minimum 25 chicks, (20 poults) for shipping.

Additional charges may apply if a confirmed order is changed or cancelled.

100% LIVE ARRIVAL GUARANTEED – ALWAYS. Please see our guarantee and disclaimer below

****IMPORTANT****

We warrant that the poultry described in the order will be in good condition, so far as can reasonably be determined, at the time of delivery by us. Established flock control, egg selection, production, and handling methods (including established sanitary and disease control standards) generally accepted in the industry, are in place. It is understood, agreed and considered reasonable that THERE ARE NO WARRANTIES, EXPRESSED OR IMPLIED, WITH RESPECT TO THE POULTRY OTHER THAN THOSE SPECIFICALLY STATED IN THIS AGREEMENT, AND SELLER SPECIFICALLY DISCLAIMS ANY WARRANT OF MERCHANTABILITY OR FITNESS OF THE POULTRY.

The seller's liability for any reason whatsoever shall be limited to the amount paid for the goods or services claimed to be defective, and that in no event shall Seller be held liable for any consequential or incidental damages. By acceptance of the poultry, the Buyer acknowledges that the limitations and disclaimers herein set forth are conditions of the sale, and constitute the entire agreement between the parties regarding warranty or other liabilities and the remedy therefore. The purchaser or agent is required to examine the birds and must report any mortalities or other problems to the shipping company prior to leaving the point of pickup.

VERY IMPORTANT ORDERING INFORMATION

If ordering through an agent please place your order directly with the agent- print or write your order clearly with your name, address, postal code and telephone number. You will receive a confirmation within a few days of us receiving your order. If there is no agent in your area, we are still able to supply you with your poultry requirements. You may order directly from us.

SPECIFY DATE on which you desire delivery. If we cannot ship on the date you specify, we will book for the closest date available and advise you at once. Please try to place your orders a minimum of 4 weeks in advance.

INDICATE SECOND CHOICE -- Please specify your second choice of breed (if any) in space provided on the order forms. Substitution will not be made unless absolutely necessary.

TERMS -- Pay in full with order. We accept VISA and Mastercard. When ordering through an agent, please pay agent directly for your order. Where there is no agent, order must be paid in full at least 7 working days before shipping date. Pickup and brood orders included.

PARCEL POST SERVICE
